

GEARBOX SET 1:60 WITH DRILL EHB 32

SET

No. 12387

Gearbox set 1:60 EHB 32 is **designed for installation of BAYO·S - HOBBY Ø 65 mm and SEMI Ø 76 mm.**

The gear set **multiplies the power of the drill used in the ratio 1:60.**

In combination with the proven Eibenstock EHB 32 two-speed drill, it drills ground screws up to a depth of 1250mm. Pre-drilling is recommended.

The kit ensures a solid connection between the gearbox and the EHB 32 drill. It also serves as a cover and **protects the user from being caught against the spinning part.**

By clamping the telescopic bar, the speed is transferred to the gearbox output and further to the ground screw.

Compatible with HEX drill heads with hexagonal input.

We recommend pre-drilling especially before installing 76 mm diameter ground screws or before installing in hard clay. Use a solid drill bit for concrete, pre-drill the ground to the desired depth and pour water.

PREPARING INSTALLATION:

GEARBOX SET 1:60 WITH DRILL EHB 32

SET

No. 12387

Specification:

Model	Gearbox set 1:60 EHB 32
Number of set:	No. 12387
Weight of set:	38 kg
Set size without 59130:	685 × 365 × 220 mm
Size of telescopic bar:	Ø 100 × 1490-2890 mm
Maximum torque of the set:	4.320 Nm
Drill power:	1800 W
Rated voltage:	230 V (or 110 V to order)
Number of set parts:	6 pcs see components
Gearbox output:	Hexagonal HEX
Compatibility:	BAYO.S installation heads with HEX input

Components of gearbox set:

1. Gearbox 1:60 No. 005.0002387
2. Eibenstock EHB 32 No. 0152H000
3. Connecting kit EHB 32 No. 59131
4. Baseplate hinge No. 59129
5. Handlebar No. 59128
6. Telescopic bar No. 59130

Optional accessories and installation heads:

Transport case
No. 59312

HOBBY screws wit lock
No. 59351

HEX, ROUND, RIM screws
No. 59313

NUT-3 76 screws
No. 59314

Level pipeline spirit
No. 30013

NUT-4 89 screws
No. 59326

NL extendable screws
No. 59312
